

EMPLOYEE LEAVE – LEAVE REQUEST

Feature Set II

Manage Leaves • Track Requests • Keep Work Moving

Happy
Employees!
Build a
Better Workplace

Feature Set II

1. Employee Details
2. Manager Details
3. Leave Request
4. Leave Dates
5. Approval

System Modules

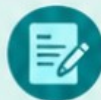

Employee Details

- Employee ID
- Name
- Department
- Designation
- Contact No.

Manager Details

- Manager ID
- Name
- Department
- Designation
- Contact No.

Leave Request

- Leave Type
- Reason
- Number of Days
- Status
(Pending / Approved / Rejected)

Leave Dates

- Start Date
- End Date
- Total Days

Approval

- Manager Review
- Approve / Reject
- Remarks
- Updated Status

Requirements

Functional Requirements

(What the system should do)

1. Allow employees to view and update their personal details.
2. Allow employees to select a manager from the system.
3. Enable employees to submit a leave request with leave type, reason and dates.
4. System should calculate the total number of leave days automatically.
5. Show the status of the leave request (Pending / Approved / Rejected).
6. Allow the manager to view requests and approve or reject them with remarks.
7. Update the leave record in the system after approval.

Non-Functional Requirements

(How the system should work)

1. Easy to use and simple interface (user friendly).
2. System should be fast and respond quickly.
3. Data should be safe and secure.
4. Only authorized users (employees and managers) should be able to access the system.
5. System should work without major errors and be reliable.
6. Should be compatible with common browsers and devices.
7. Data should be stored properly and not lost even after power failure.
